

CEAR Argentina

Among our activities, we are about to open a new discussion space in our website and we'd like to invite you to participate. This new space is called 'Crosswords'.

Its main purpose is to discuss different approaches on various topics, to think about current environmental issues and / or to discuss new perspectives on the challenges of agriculture, from different social and humanistic approaches.

The aim is to facilitate and encourage academic debate, so the language and format of the presentations are absolutely free. For example, we offer you some possibilities: short texts (three pages maximum), images to discuss, YouTube videos, creative presentations (such as power points with audio), audio recordings (such as podcasts), etc.

Of course, your presentation can be a work (or works) previously done or fragments of a reasearch in progress. They can also be co-authored with other colleagues. It should be noted that in all cases, you can choose the contribution option you prefer, and it must always be preceded by a title.

So, you can choose a topic of your preference.
